

CLIENT CASE STUDY: DRAX GROUP - HARGREAVES SERVICES

1. Sector: Municipal Wastewater

2. Client: Drax Group working with Hargreaves Services plc as the principal contractor.

Figure 1 - Daldowie Power Station (near Glasgow) was recently acquired by Drax - purchasing Scottish Power assets for £702m.

Figure 2 – Loading Bellows, which form part of an extensive product range SAVECO provides for Industrial & Municipal WWT sectors.

3. Project Overview & Scope:

SAVECO was provided a complex brief to deliver:

- 8 x Loading Bellows (see Fig.2 above) that allow Municipal Sludge pellets to be loaded directly into tankered lorries – preventing any dust or odour from entering the atmosphere.
- Thanks to creative problem solving, SAVECO applied a robust solution, which worked successfully for one of our clients in the Agricultural sector, and transferred to a Municipal WWT context.

4. Project Value & Duration:

- <£200,000. 9 months for design, supply and delivery plus a further 6 months offering specialist consultancy support to the customer.

5. Project Outcomes

- Priding ourselves in going above and beyond for our clients, we are providing an additional 6 months of project management consultancy support to help Hargreaves negotiate complex and continually evolving requirements from key internal and external stakeholders associated with the project.
- The solution itself is currently being installed and commissioned by the customer without delay.
